

DRIVE AROUND THE BLOC

OXFORD, ENGLAND

ROAD BLOC™

1 Linking

45° hinge connection enables both straight and angled configurations with just 8 units creating circle/mini roundabout.

2 Stability

Manufactured with sealed seams so easy to fill with water via hose at top of end section.

3 Added visibility

High intensity class R2 reflective panels can be applied to the red and white units and also posts and rails can be inserted for added visibility.

4 Stacking, Storage and Transportation

Roadbloc is designed with forklift access slots for ease of deployment, supplied banded 20 per colour.

5 Branding

Large plated area where contractor details can be embossed in black to deter pilferage and promote contractor details.

6 NEW Recycled Option

Made from 100% re-processed black material making this an affordable alternative, supplied as standard with class R2 reflective panels each side.

ROADBLOC™ DIMENSIONS	EMPTY WEIGHT	LITRES TO FILL	FILLED WEIGHT
