

## RC2 Tripod

Compact, rapid deployment  
with AutoGreen Technology

The RadioConnect2 Tripod is the ideal solution when rapid deployment is needed to keep traffic flowing. The most advanced tripod traffic light on the market, the RC2 Tripod features the same innovative technology as the RadioConnect2 but in a compact form, suitable for transport in a wide range of vehicles. The Tripod RC2 is available in AutoGreen or Lite versions and is compatible with the standard RC2 unit.

### APPLICATIONS

Traffic

### FEATURES

- AutoGreen enabled
- Compact, ideal for rapid deployment
- Well suited to gang works and short-term jobs

 Portable

The innovative solution for a safer, greener and more efficient roadworks environment.

The ideal solution when rapid deployment is needed to keep traffic flowing.

## RC2 Tripod

The RC2 Tripod is a revolutionary new tripod design, with integral, head-mounted battery and adjustable legs for use on uneven ground. It is highly portable and designed for quick deployment, ideal for gang works and short-term jobs.

It is available with AutoGreen, a new mode that dynamically adjusts green timings for 2-way operation, proven to improve efficiency of 'tidal flow' conditions at different parts of the day.

- Maintenance-free AGM battery integrated into the head, providing best-in-class run-time of at least 36 hours, with battery level indication and estimated hours remaining
- Advanced **AGD FMCW radar**, capable of separately tracking each approaching vehicle
- High-performance, **Active Channel Management (ACM)** radio system for reliable communication
- Controller capable of being either a master or slave, supporting up to 4 ways, plus linked slaves
- Batteries are 'hot swappable' for continuous in-service operation and in-car charger kit option available
- Available with or without **AutoGreen Technology**
