# Red Band MB 14" Bridge Saw – 110/220V Electric

The MB Bridge Saw is a robust, strongly made bridge saw which has been specifically designed and developed to perform a multitude of cutting applications on a wide variety of building materials including large floor and wall tiles, roof tiles, natural stone, masonry materials, concrete slabs, blocks and similar concrete based products. The options are the MB100 and MB120 bridge saws.

Designed with our team of in-house experts, this bridge saw has a lot of the features that you would only expect to find on a more expensive machine. With over 40 years experience in the industry, our design team had two objectives in mind when designing this machine; easy of use and simplicity.

Pick your size and voltage using the dropdown options below, also you can add a side extension table to provide a larger working area.

**Minimum 3kVA continuous-rated transformer or 5kVA intermittent-rated transformer recommended. See our [transformer guide](#) for more information.**

**£2,142.00**  
**£1,785.00** Exc. VAT  
**RRP from £2,856.00** Inc. VAT

Minimum 3kVA continuous-rated transformer or 5kVA intermittent-rated transformer recommended. See our [transformer guide](#) for more information.

DETAILS

The MB series of saws each feature a swivel mounted cutting head which traverses on a linear bearings on two rigid stainless steel rails, reducing deflection of the cutting head over the entire cutting length.

The table lengths range from 1000mm on the MB100 to 1200mm on the MB120. The MB model numbers refer to how many centimetres the length of the table measures. The blade that you need for these bridge saws has to be 14", which is 350mm.

If you have a particular cutting requirement then please contact us and we will advise the best options for you.
